New Delhi, India

SUMMARY

Full-Stack Developer with 6+ years of experience building web applications and backend systems using Node.js, Express.js, PHP, Laravel, JavaScript, React.js, Vue.js, and MySQL/MongoDB. Experienced in developing REST APIs, authentication and authorization, database-driven applications, responsive user interfaces, third-party integrations, payment gateways, and real-time features. Worked across e-commerce, SaaS, government, real estate, and MLM domains, contributing to both frontend and backend development. Experienced in building applications independently as well as working with development teams, with recent experience focused on Node.js-based backend development and modern frontend technologies.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, SQL

Frontend: React.js, Vue.js 3, Next.js, HTML5, CSS3, TailwindCSS, Bootstrap, jQuery, AJAX

Backend: Node.js, Express.js, Laravel, CodeIgniter 3/4, Core PHP, REST APIs, JWT, RBAC, MVC, Webhooks, Background Jobs, Cron Jobs.

Databases: MongoDB, MySQL, PostgreSQL, Redis, SQL Query Optimization, Indexing

Cloud & DevOps: AWS S3, AWS Lambda, Google Cloud Storage, GitLab CI/CD

Integrations: Stripe, Paytm, PayU, WordPress/WooCommerce REST API, SendGrid, Twilio, OpenAI API

Tools & Processing: Puppeteer, Playwright, Cheerio, PDF Generation/Parsing, Web Scraping

EXPERIENCE

Senior Software Engineer

24 Jul 2023 - Present

E2logy Software Solutions Pvt. Ltd | Noida

- Developed and maintained web applications and REST APIs using Node.js, Express.js, PHP/Laravel, MongoDB, and MySQL.
- Developed the backend for a Business Card Builder SaaS platform using Laravel, including customizable layouts and dynamic design/CSS configuration management.
- Built and maintained frontend interfaces using modern JavaScript-based technologies based on project requirements.
- Implemented authentication flows using JWT and role-based access control for different user types.
- Developed webhook listeners and background jobs for notifications, PDF generation, and other asynchronous tasks.
- Worked on an MLM SaaS platform covering distributor management, order processing, commission calculations, and payout workflows.
- Built two-way synchronization between the MLM system and WordPress/WooCommerce using REST APIs and webhooks.
- Developed bulk product import/export functionality and automated PDF report generation.

Junior Software Developer

03 Jan 2022 - 22 Jul 2023

XS Infosol Pvt. Ltd | Noida

- Developed backend systems for enterprise and government projects using PHP, CodeIgniter 4, MySQL, JavaScript, HTML, CSS, and Bootstrap.
- Developed a KYC verification module covering PAN, Aadhaar, Voter ID, and Driving License verification with automated PDF generation.
- Delivered government projects including the DoT DCIS Scheme for Startups & MSMEs and 5G Hackathon platform as per project requirements.
- Resolved SSL-related issues, optimized slow MySQL queries, and implemented Paytm payment integration for the Smartguard Bandwidth Management System.
- Developed dynamic badge printing functionality with QR code and color printing support for an Event Management System.

Web Developer

14 Jul 2020 - 31 Dec 2021

Westonik Web Solution Pvt. Ltd | Prayagraj

- Built and maintained 16 web applications across e-commerce, MLM, real estate, hotel listing, and medical domains using Laravel, Core PHP, MySQL, JavaScript, HTML, CSS, and Bootstrap.
- Developed web interfaces and backend functionality for multiple business applications based on client requirements.
- Integrated Paytm and PayU payment gateways, mobile OTP authentication, and transactional email across multiple projects.

- Built a Real Estate CRM from scratch with separate panels for administrators, associates, employees, and customers, including sales and inventory management.
- Worked on multiple MLM platforms covering user management, transaction flows, and reporting.

PROJECTS

Wire Transfer & Emergency Notification Management System

| **Technologies:** Node.js, Express.js, MongoDB, Vue.js 3, TypeScript, Vuetify, GitLab CI/CD, GCP Bucket, SendGrid, Twillio
| **Key Achievements:** Independently developed a full-stack wiretransfer management system featuring Role-Based Access Control (RBAC), secure wire transfer workflows, automated notifications, and integrated cloud document storage.

Digital Business Card (SaaS)

| **Technologies:** JavaScript, Node.js, Stripe API, Dynamic HTML/CSS Generation, MySQL/MongoDB
| **Key Achievements:** Developed the core backend logic to dynamically generate and save customized CSS business card layouts into the database based on client requirements.

C³ MindLoop - Modern Developer Productivity Platform <https://c3mindloop.com/>

| **Technologies:** Next.js, Tailwind CSS
| **Key Achievements:** Independently engineered a responsive frontend architecture and fluid UI layout, utilizing AI-assisted development tools to audit, refactor, and deliver a high-performance web application with seamless user interactions.

AI Automation POC

| **Technologies:** Node.js, React.js, OpenAI API, LangChain, Pinecone, Socket.io
| **Key Achievements:** Built an internal AI-powered automation tool featuring secure multi-format document search, real-time chat assistance, dynamic content generation, and integrated speech processing.

MLM SaaS Backoffice

| **Technologies:** Node.js, Express.js, MongoDB, Vue.js 3, Redis, Bull Queue, WooCommerce REST API
| **Key Achievements:** Engineered a high-throughput multi-level marketing platform featuring a scalable commission engine, multi-environment deployment, and automated two-way distributor/product sync with WordPress/WooCommerce.

Government E-Governance & Scheme Management System

| **Technologies:** Node.js, MySQL, JavaScript, HTML5, CSS3, Bootstrap
| **Key Achievements:** Developed a secure enterprise scheme platform strictly adhering to NIC Security Guidelines and OWASP Top 10 mitigations, implementing robust data sanitization, and CSRF/XSS protection mechanisms.

Smart Guard - Enterprise Bandwidth Management

| **Technologies:** Core PHP, Linux Shell Scripting (Bash), MySQL, Linux Network Utilities
| **Key Achievements:** Successfully maintained and upgraded a legacy enterprise software (originally built in 2000), analyzing outdated codebase to implement new custom modules based on management requirements.
